SABA – is a volcanic island located just south and east of Puerto Rico – 28 miles Southeast of St Maarten. The island is known for its diving and walking trails through the rainforest.

Along the cliffs directly under sea level a remarkable world unfolds itself. There are many types of coral and multicolored large sponges. The reefs are populated with schools of tropical fish. It is possible to swim with tiger grouper, grey reef sharks, hawksbill and green turtles and see long snout or lined seahorses. You will encounter thermal springs and mysterious lava tunnels. It is a special diving experience navigating through the lava rocks of Ladder Labyrinth. There are no beaches, but plenty of sea mounts and pinnacles and the dive sites are about 20 minutes away.

After diving there is the pool, Jacuzzi or a short stroll to town. Relax at the Day Spa located within walking distance of the Hotel. There are 7 restaurants, a 3 – 5 minute walk away from the Hotel.
